Dear AquaMED,

Your AquaMED beds have truly changed my practice.

My patients are always so excited to use the beds. Typically I use them for chronic pain, circulation problems, and neck, back, or shoulder problems. Everyone from children to elderly patients loves these beds, and they're great for patients who can't do intersegmental traction, or those who can't sit in a massage chair. I'm getting anywhere between \$13-20 per session, and I'm putting at least 20-30 patients per day on the beds.

As far as the results go, my practice has really exploded. I'm seeing 4-5 new patient referrals a day, and at least half of them are resulting directly from the beds. So, I'd estimate that AquaMED is bringing in between 25 and 35 new patients a month to my practice, and that is without any marketing. I simply don't need to do any marketing because once somebody gets on one of the beds, they market it to their friends and family for me.

After buying my first bed in 2004, I bought my second bed a little over a year later. I would absolutely recommend AquaMED to anyone.

Sincerely,

Jeffrey Shirley, DC
